Project setup	X	X													
Information Retrieval															
Familiarise with Mendeley API			X												
Crawl members' names				X											
Download information from Mendeley API	Deleted task: Mendelet API doesn't work properly so we decided to use other sources														
Take members' relations (*)				X											
Take more information (names + relations) (*)						X									
Data management															
Data filtering (extract useful info)				X	X										
Data organization (matrices, files,...)				X	X										
PageRank algorithm															
Graph Partitioning															
Additional analysis of the information															
Project report															
Project poster															

	Week divided between the tasks
	All the week for the task (except the ones with the report)
	Weeks with only 4 days
	Only one day per week
	Holiday
	Dependencies
(*)	These are the new tasks introduced since we cannot use the API for take information. We decided to crawl some conferences sites and take from there all we need: <ul style="list-style-type: none"> <li>- Names of members of Swiss institutions</li> <li>- Relations: two members are related if they did a conference together</li> </ul>
