Project setup	X	X														
Information Retrieval																
Familiarise with Mendeley API			X													
Crawl members' names				X												
Download information from Mendeley API	Deleted task: Mendelet API doesn't work properly so we decided to use other sources															
Take members' relations (*)				X												
Take more information (names + relations) (*)						X									D	
Data management																
Data filtering (extract useful info)				X	X					Xe						
Data organization (matrices, files,...)				X	X					Xe						
PageRank algorithm																
Graph Partitioning																
Additional analysis of the information																
Project report								D								
Project poster																

	Week divided between the tasks
	All the week for the task (except the ones with the report)
	Weeks with only 4 days
	Only one day per week
	Holiday
	Dependencies
X	Completed task
Xe	Completed one week early
D	Delayed task
(*)	These are the new tasks introduced since we cannot use the API for take information. We decided to crawl some conferences sites and take from there all we need: <ul style="list-style-type: none"> - Names of members of Swiss institutions - Relations: two members are related if they did a conference together
