Project setup	Х	Х													
Information Retrieval															
Familiarise with Mendeley API			X												
Crawl members' names				X											
Download information from Mendeley API	Deleted task: Mendelet API doesn't work properly so we decided to use other sources														
Take members' relations (*)				X											
Take more information (names + relations) (*)						Х									
Data management															
Data filtering (extract useful info)				X	Х										
Data organization (matrices, files,)				X	Х										
PageRank algorithm															
Graph Partitioning															
Additional analysis of the information															
Project report															
Project poster
