Information Retrieval															
Familiarise with Mendeley API			X												
Crawl members' names				X											
Download information from Mendeley API			Deleted task: Mendelet API doesn't work properly so we decided to use other sources												
Take members' relations (*)				X											
Take more information (names + relations) (*)						X								D	
Data management															
Data filtering (extract useful info)				X	X				Xe						
Data organization (matrices, files,…)				X	X				Xe						
PageRank algorithm									X

	Legend
(orange)	Week divided between the tasks
(green)	All the week for the task (except the ones with the report)
(cyan)	Weeks with only 4 days
(yellow)	Only one day per week
(pink)	Holiday
↘	Dependencies
X	Completed task
Xe	Completed one week early
D	Delayed task
(*)	These are the new tasks introduced since we cannot use the API for take information. We decided to crawl some conferences sites and take from there all we need: - Names of members of Swiss institutions - Relations: two members are related if they did a conference together
